DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Applicant's representative Mr. James Love (Reg. No. 58,421) on 7/20/2009.

In the Claims:

Please replace claim 17 with the newly proposed amended claim, as shown below:

Claim 17 (Currently Amended): An image processing method executed using an image processing apparatus having an obstacle detection unit, comprising: Inputting a plurality of frame images serving as video images; detecting, using the image processing apparatus and from each frame image in the plurality of frame images, a straight line component in a horizontal direction in a three dimensional space, the horizontal line being parallel to an image plane of the respective video image,

generating an obstacle candidate area as an image area in a vicinity of the detected straight-line component;

tracking the obstacle candidate area in an image succeeding each frame image in the plurality of frame images, and producing a tracking result for the obstacle candidate area;

determining, using the image processing apparatus and using the tracking result of three or more obstacle candidate areas, whether the three or more obstacle candidate areas belong to a plane extending in a specific direction in a three dimensional space, and producing a determination result, the determining further including selecting a candidate area group consisting of three or more obstacle candidate areas, and computing a fitness between the candidate area group and a predetermined plane and evaluating whether the candidate area group belongs to the predetermined plane based on the fitness; and

detecting, using the image processing apparatus, an obstacle based on the determination result.

Allowable Subject Matter

2. Claims 1, 3-5, 7-9, 11-13, 15-17 and 19-21, renumbered as claims 1-16 are allowed.

Claims 2, 6, 10, 14 and 18 have been canceled.

3. The following is an examiner's statement of reasons for allowance: The prior art of the record fails to anticipate or fairly suggest, an image processing for detecting an obstacle, wherein the means for determining includes: means for selecting a candidate area group consisting of three or more obstacle candidate areas; and means for computing a fitness between the candidate area group and a predetermined plane and evaluating whether the candidate area group belongs to the predetermined plane based on the fitness, along with all other limitations as specifies in independent claim1, and

similar limitations in independent claims 9 (renumbered as claim 7), 17 (renumbered as 13) and 21 (renumbered as 16).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
